Applicant's election of Group I including claims 1-101 in the reply filed on 02-23-2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

This application is in condition for allowance except for the presence of claims 102-103 directed to invention non-elected without traverse above. Accordingly, claims 102-103 have been cancelled.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

#### **In The Claims**

Claim 29, line 2, "said electric field strength" should be changed to -- said first or second electric field strength --.

Claim 30, line 2, "said electric field strength" should be changed to -- said first or second electric field strength --.

Claim 33, lines 3-4, "on to" should be changed to -- onto --.

Claim 33, line 6, "on to" should be changed to -- onto --.

Claim 66, line 2, "said magnetic field strength" should be changed to -- said first or second magnetic field strength --.

Claim 67, line 2, "said magnetic field strength" should be changed to -- said first or second magnetic field strength --.

Art Unit: 2881

Claim 84, line 1, "any" should be deleted.

Claim 89, line 1, "34" should be changed to -- 88 --.

Claims 102-103 have been cancelled.

A telephone call was made to Jamie H. Rose on 03-20-2006 to correct the antecedent basis and typographical errors above, but did not result in an examiner's amendment being made.

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose a detector for use in a mass spectrometer, which includes a detecting surface having a first portion or region for detecting electrons released from a microchannel plate at a first time  $t_1$  and having a second different portion or region for detecting electrons released from the microchannel plate at a second later time  $t_2$  as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
